

## **Arrival Checklist**

to arriving at the campsite: Check-in at the office to get parking spot information - be sure to ask about hookups, WiFi password, and a map of the area
Check black and gray water tank levels - if the site does not have sewer hookups, stop at the designated area and empty the tanks
Check fresh water tank levels. If freshwater hookup is not available, be sure to fill up this tank as well
ring at the campsite: Check location for trees, fences, and other obstacles or hazards
Determine your parking plan for the site (pull-through or back-in)
If you are towing a vehicle, be sure to unhook before backing into the parking spot
Use a spotter if possible to help back into the spot
Parking: Set the parking brake
Place the wood blocks under the leveling jacks so you don't leave an impression on the asphalt
Level the coach both laterally and lengthwise
Deploy the steps
Unlock slides and deploy (have someone outside watching in case

☐ If you have a surge protector - plug it in

Connect shore power and make sure breaker is turned on
Connect cable tv, freshwater, and sewer lines as needed and available
Empty black water tank if needed and then close the tank (do NOT leave the tank open or you will quickly learn about the poop pyramid)
Turn on propane valves and check for leaks
Turn on the air conditioner or furnace and set the thermostat
Turn on the water heater
Confirm the refrigerator is on and working
Unlock all cabinets and remove all fasteners
Set up all items that remain outside - grill, chairs, etc
Raise roof-mounted antenna or satellite dish
Set up inside area - coffee maker, ottoman, area rugs, etc.
Double-check all systems are on and functioning as expected
